Tips

Publish visually engaging Page posts.

While a diverse set of post types is important, posts including a photo album or picture can generate 2X more engagement than other post types¹.

Use Page Insights to optimize your Page posts.

For example, find out when people engage most with your content and post during those hours. On average, we have found that people visit and engage with Pages most often between 9pm and 10pm, with the 18-24 age group being the most active².

Set your best posts as “Allowed on Timeline”

Make sure that visitors of your Page see your most important content. Set your favorite posts from others to “Allowed on Timeline” in the activity log.

Edit your views and apps

Adjust the way your custom apps appear on your Page by going to “Manage” from the admin panel and choose “Edit Page” in the drop-down menu. Under the “Apps” section, click “Edit Settings” for the specific app image (111 x 74 pixels) you’d like to adjust.

Take advantage of larger app width

Page app width can now be adjusted to be “Narrow” (520px) or “Wide” (810px) in the Developer App under “Edit App”. The Developer app can be found here: <https://developers.facebook.com/apps>
